Concussion: Statement of Student-Athlete Responsibility and Parent Awareness - Louisiana Youth Concussion Act 314

What is a Concussion?
A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head that causes the head and brain to move quickly back and forth. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

Facts about Concussions
1. A concussion is a serious brain injury
2. Concussions can occur without a loss of consciousness or other obvious signs
3. Concussions can occur from blows to the body as well as to the head
4. Concussions can occur in any sport
5. Athletes can still get a concussion even if they are wearing a helmet
6. Recognition and proper response to concussions when they first occur can help prevent further injury or even death.

Symptoms Reported by Athlete:
- Headache or “pressure” in head
- Nausea or vomiting
- Balance problems or dizziness
- Double vision
- Sensitivity to light or noise
- Confusion
- Feeling sluggish, hazy, foggy, or groggy
- Blurry vision
- Just not “feeling right” or is “feeling down”
- Concentration or memory problems

Signs Observed by Parents, Friends, Teachers, or Coaches
- Appears dazed or stunned
- Loses Consciousness (even briefly)
- Is confused about what to do
- Moves clumsily
- Forgets plays or instruction
- Answers questions slowly
- Is unsure of game, score, or opponent
- Shows mood, behavior, or personality changes
- Can’t recall events prior to hit or fall
- Can’t recall events after hit or fall

Concussion Danger Signs
- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Has unusual behavior
- Becomes increasingly confused, restless, or agitated
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

Signs and symptoms of a concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury. If an athlete reports one or more symptoms of a concussion listed above after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury and until a health care professional. Experienced in evaluating for concussion, says s/he is symptom-free and it’s OK to return to play.

Statement of Student Athlete Responsibility
I accept responsibility for reporting all injuries and illnesses to the coach and parent(s) including any signs and symptoms of a Concussion. I have read and understand the above information on concussions.

Student Printed Name ___________________________ Student’s Signature ___________________________

As a parent of the above mentioned student, I am also aware of the issues concerning concussions as mentioned in this document and agree to adhere to these guidelines.

Parent’s Signature ___________________________ Date ___________________________
