

Google Workspace and Digital Opt-Out Form

If you **DO NOT** want your student to access Google Workspace for education, or any other online resources, please complete the following form.

The East Baton Rouge Parish School System is a Google Workspace for Education district. The digital devices that are available for student use in classrooms are Chromebooks that require a Google Workspace for Education account in order to login.

This means that by choosing to opt your child out of receiving an East Baton Rouge Parish School System Google Workspace for Education account, he or she may not be able to access digital content or use Chromebooks.

For more information about Google Workspace see the Student Handbook and Section Twenty.

If you have any questions, please contact your child's school.

You must complete one form for every child you wish to opt-out of online digital resources.

Name of Student (Print)

Grade Level

School Student Attends

I wish to have my child removed from Google Workspace for Education and from 3rd party digital tools that collect personally identifiable information.
